

## Agenda

- Check-in
- What we need to do
  - Ziad: we need to tweak our Ruby on Rails stuff - use React to manipulate it
  - Richard: switch app to API, create a JSON object, then use that
  - David: React as a front-end tool
  - Elena: look at React tutorials
  - Toby: play around with creating React apps, alter our existing project
- Plan of attack
  - Do some more research tonight
